

CULTIVATION GUIDE

Lisbon Lemon

GROW HEALTHY TREES WITH THESE TIPS

SUNNY SPOT

Choose a sunny location with 6-8 hours of direct sunlight daily, shielded from strong winds.

GOOD SOIL

Opt for well draining, slightly acidic to neutral (pH 6.0 - 7).

PLANT RIGHT

Plant with the graft union above the soil level, space the trees 4m apart.

WATER WISELY

Deep, regular watering to keep soil consistently moist, mulch for moisture retentions

FEED SMART

Use citrus fertilizer in spring and late summer, avoiding excessive nitrogen

PRUNE WELL

Trim for shape and air circulation in late winter or early spring. Remove unhealthy growth.

PEST CONTROL

Watch for aphids, scale insects and spider mites. Use natural or chemical controls. Be vigilant against diseases.

HARVEST RIGHT

Pick fully yellow, firm fruit in late winter or early spring. Use pruning shears.

STORE WITH CARE

Store at room temperature briefly, refrigerate for weeks or freeze juiced lemons for long term use.

ENJOY

A thriving Lisbon lemon tree and its delicious lemons.
